

mineraltree®

Release Notes

v9.6.0

July 10th, 2017

Updates

Description	Product/Connector
Fixed an issue with the bulk post functionality, which prevented selected invoices from being posted back to the accounting system in certain cases.	All
Fixed an issue where long payment account names were being truncated on the vendor details screen and payment confirmation dialog. Payment account names are now fully legible across the application, regardless of their length.	All
Comment field is now displayed above the document image on the invoice approval webpage, making it more conspicuous.	All
Users no longer need to enter forward slashes when keying in date values, making data entry faster for date fields across the application.	All
Fixed a validation issue on the vendor details page which prevented users from entering city names with punctuation marks.	All
Fixed an error that was occurring when users attempted to save captured invoices with vendor names containing special characters.	All
Added scrollbar to reports dropdown on Reports tab.	All
Correct a problem where the cost per value of a line-item was erroneously recalculated when the total amount of the line was changed.	NetSuite, Quickbooks Desktop, and Quickbooks Online
MineralTree now supports up to 8 decimal places for cost per values on invoice line-items. Total amounts are still rounded to the nearest hundredth.	NetSuite
MineralTree now supports up to 5 decimal places for quantity values on invoice line-items. Total amounts are still rounded to the nearest hundredth.	NetSuite
Added support for "Description" type line-items. These line-items will now sync to and from NetSuite successfully.	NetSuite

Description	Product/Connector
Purchase orders are now marked as fully billed only when the quantity billed equals the quantity ordered, instead of when the amount ordered equals the amount billed.	NetSuite
The initial sync no longer repeats unnecessarily if no bills are found in accounting system.	Quickbooks Desktop
The initial sync no longer fails if there are no bills in the accounting system.	Microsoft Dynamics GP

Connector Update Required?

Connector	Update Required?
QuickBooks Desktop	No
Microsoft Dynamics GP	No

*Cloud connectors (Intacct, NetSuite, QuickBooks Online) are updated automatically. No action is required by the end user.
