

# mineraltree®

## Release Notes

v12.9.0

August 23rd, 2018

### Updates

Description	Product/Connector
Fixed an issue where search autosuggestions did not return expected values for search strings containing special characters.	All
Added “Approve”, “Reject”, and “Hold” buttons at the bottom of the Payment Details page in the payment authorizer application.	All
Changed the display order of invoice documents such that the original invoice document is always displayed first.	All
For customers capturing VAT tax on invoices, calculated tax amounts are now correctly rounded up when appropriate.	All
Invoices can now be sorted by Vendor Name in the Invoice Approver Application.	All
Added a new report to track changes made to vendor details, including vendor payment information.	All
Upgraded application support to use latest NetSuite API. Users must reinstall the updated MineralTree bundle within NetSuite and reauthenticate from within MineralTree. See this link for detailed instructions: <a href="https://mineraltree.zendesk.com/hc/en-us/articles/360012524552-Update-Existing-MineralTree-NetSuite-Connector-with-MineralTree-Integration-Bundle">https://mineraltree.zendesk.com/hc/en-us/articles/360012524552-Update-Existing-MineralTree-NetSuite-Connector-with-MineralTree-Integration-Bundle</a>	NetSuite
Added support for token-based authentication between NetSuite and MineralTree. See above link for more details.	NetSuite
Fixed an issue where expense line description fields did not sync properly from Microsoft Dynamics GP to MineralTree.	Microsoft Dynamics GP
Added support for wire payments made to vendors in Romania or Croatia.	FlexPay
Fixed an issue where the default payment method was sometimes not updated as expected when new FlexPay files were processed.	FlexPay

## Connector Update Required?

Connector	Update Required?
QuickBooks Desktop	No
Microsoft Dynamics GP	No

\*Cloud connectors (Intacct, NetSuite, QuickBooks Online, Xero, Aqilla) are updated automatically. No action is required by the end user.
