Release Notes

v13.1.0

September 26th, 2018

Updates

Description	Product/Connector
Improved performance of the Payment Authorizer application when loading the Payments tab and approving multiple payments.	All
Added a new setting to the Customer Administration application, which allows users to compare a POs received quantity with the invoice quantity when evaluating a PO-Invoice line match, instead of the billed quantity and invoice quantity.	All
Adding new “Merge” button to the invoice details page, which allows users to combine all line-items or expenses into one.	All
If a PO number is captured on an invoice, all lines on the newly created invoice will default to line-items instead of expenses.	All
Fixed an issue where Manual Card type payments couldn’t be made with an Amex enabled credit card account.	All
Corrected an issue where the wrong default paid from account displayed on the Payment Confirmation dialog for credit card payments.	All
Added explanatory hover text to the “Convert to Expense/Line-Item” button on the invoice details page.	All
Invoice Total Amounts are now calculated properly after the user tabs out of a line Net Amount field.	All
Closed Purchase Order numbers no longer appear as hyperlinks on the invoice details page.	All
Users are now required to manually validate their bank account numbers during onboarding to ensure accuracy.	Intacct
Fixed an issue where focus was lost after tabbing out of the “Cost Per” field.	QuickBooks Desktop
